# SPAIN energy

ISSUE #3 JANUARY 2011

## SUMMARY

- 2 CIUDEN** CO2 capture, transport and storage technologies
- 3 COMBUSTION BIOMASS** A 20mw thermal heat boiler for El Bierzo
- 4 GEOGNOSIA** Geophysical services
- 6 GEOPLAT** A promising period for geothermal energy in Spain
- 8 CENER** 2nd generation biofuels
- 10 ACCIONA** Acciona grid connects its 3rd CSP plant in Spain
- 12 PASTECH** Water treatments for industrial processes
- 14 SRB** High performance thermosolar collector for any kind of use
- 16 BARLOWORLD FINANZAUTO** Diesel generator
- 18 SCHOTT** An oasis for green technologies
- 20 TEKNIKER** Tekniker-IK4 technology
- 22 DURO FELGUERA** Duro Felguera executes its largest power plant
- 24 ZIGOR** New Sunzet 125 MW
- 25 SOLARTIVA** Tracking technologies for buildings
- 26 MICROGRIDS** The change of paradigm
- 27 GRUPO CLAVIJO** Photovoltaic sun tracking and fix mounting system
- 28 HELLÍN ENERGÉTICA** Introducing the first CIGS module plant in Spain
- 32 ZYTEL** New electric cars
- 34 HIDROFLOT** Hidroflot technologies
- 36 FORO NUCLEAR** A nuclear power boost at global scale
- 38 IAB** Andalusian Institute of Biotechnology
- 40 HELIOSOLAR** Growing in Spain, Italy and France
- 42 AVEBIOM** A high-tech plant where olives become energy

Dear Reader,

In your hands you've got a new issue of SPAIN energy in which we want to present the latest technologies used by Spanish companies on the global energy mix. The companies and research centers that appear in our pages have in common the desire to be on the international market, bringing its capacity, experience and technology in the different fields where they develop their activity.

Spain is a global leader in research, production, storage and distribution of energy through the efforts of entrepreneurs, scientists, technicians and field personnel who combine their efforts every day to make possible a reality that we just begin to perceive. Obviously that reality won't be other than the energetic production in a sustainable way. For all those who make this possible our applause and recognition from SPAIN energy.

The editor.
